**Re: BC NDP Response to FIPA**

Dear BC Freedom of Information and Privacy Association (FIPA),

David Eby and the BC NDP are committed to transparency of government. We believe in the role the media plays in keeping governments accountable and commit to being transparent on the decisions being made.

We have a fully costed platform, released earlier in the campaign so people can know what our priorities are. After weeks of hiding his platform, John Rustad's platform hides the services that he would cut.

We've also made important changes to make government more accountable:

- We amended the Information Management Act to formalize public servants' obligation to document decisions.
- We've increased proactive disclosures by 88 percent and added seven additional categories.

We're going to keep being transparent and making sure the system works for people.

Thank you for reaching out to us with your questions,

BC NDP
